* During the first quarter of 2014, we adopted several changes with respect to the assignment of certain expenses to our segments. We have restated the previously reported segment results for the three and nine months ended September 30, 2013 to conform to the current presentation. The nature of the most significant changes and the related effect on segment expenses for the three and nine months ended September 30, 2013 are as follows:

- The method for allocating certain shared costs of consumer sales and care, including bad debt expense and credit card fees, was revised, which resulted in an increase in consumer segment expenses of \$25 million and \$67 million with a corresponding decrease in business segment expenses for the three and nine months ended September 30, 2013, respectively; and
- Hosting segment expenses have been conformed to the reporting of our other segments' expenses. Specifically, the progress of our integration efforts and centralization of certain administrative functions enabled us to discontinue including certain finance, information technology, legal and human resources expenses in the hosting segment, which resulted in a decrease of \$16 million and \$55 million in hosting segment expenses for the three and nine months ended September 30, 2013, respectively.

During 2013, we reallocated the discounts on our bundled services (local, long distance, and broadband) to the component products and services. The net effect of the bundled services reallocation was a reclassification of certain revenues from legacy services to strategic services. Also in 2013, we reallocated our CLEC revenues into their component products and services. The net effect of this CLEC reallocation was a reclassification of certain revenues from strategic services to legacy services. The 2013 information presented here has been restated to reflect these reclassifications.

See our SEC reports for further information.
